Figure 6

C1 thru Cn =
 Feedthrough Capacitors
 (part of feedthrough or separate capacitors)

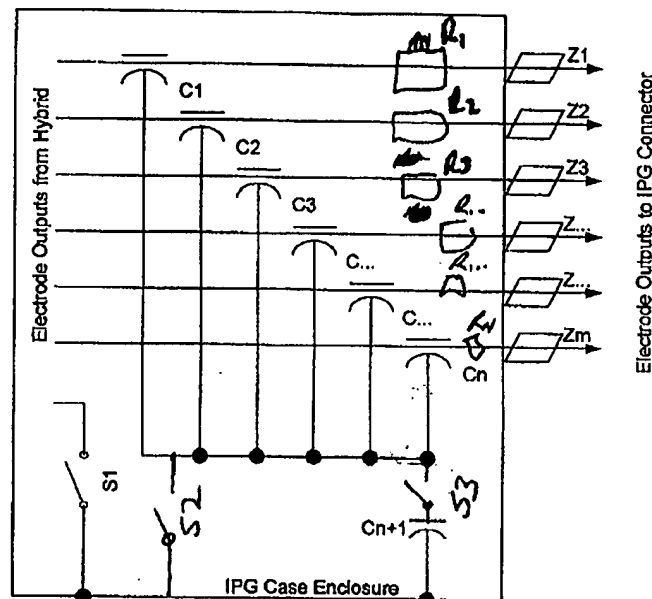

Cn+1 = common EMC capacitor to IPG case

Z1 thru Zm =
 Impedance elements on outboard side of feedthroughs (may be ferrite
 bead, resistor, or inductor)

S1 = case electrode switch (may be electronic or mechanical such as
 a reed switch)

10034945-12701

Figure 7

C1 thru Cn =
 Feedthrough Capacitors
 (part of feedthrough or separate capacitors)

Cn+1 = single case electrode

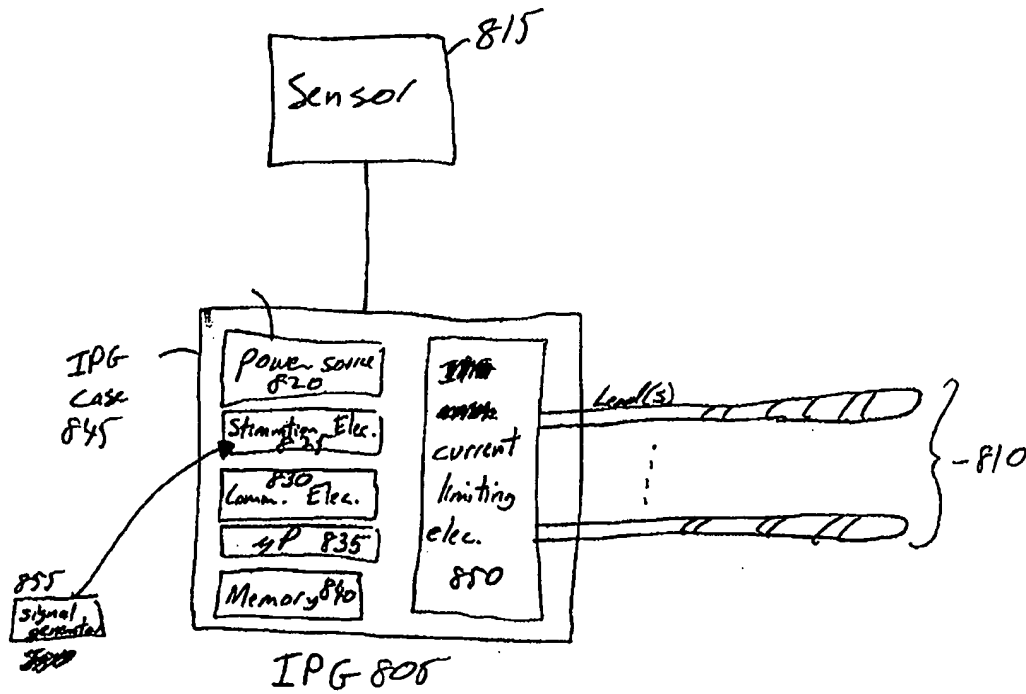

Z1 thru Zm = AC current blocking elements.
 Impedance elements on outboard side of feedthroughs capacitors
 (may be ferrite bead, resistor, or inductor)

S1 = optional switching device.
 S2 = optional switching device

S3 = optional switching device.

R1 - Rn = optional resistors
